Our relationship with our customers, are based on connections, whether personal, or electronic. Blastcomm offers individuals and organizations the fastest, most reliable means to stay connected 24 hours a day! We also stay connected to our customers by fielding questions and support issues and resolving them.

Our current subscriber base reflects a broad spectrum of customers. Some of the base services are currently providing services to the following:

Customer	Nation-Wide Dialup	ISDN	DSL	Wireless Broadband	T1 Service
Residential	X	X	X	X	
Small Business	X	X		X	X
Medium Business		X	X	X	X
School Districts			X	X	

#### Product Offerings Include:

DIAL-UP (56k) - our basic service - offers local dial nationwide. It is the perfect way to start out on the Internet at a tremendous speed.

ISDN (128k) - An upgrade from DIAL-UP offers a digital dial in service, also with numbers nationwide. (Requires ISDN line from the local phone company)

xDSL (256k -1.1m) - This is an "always on" connection at affordable prices. We POP our own xDSL and as always distance restrictions to local phone companies apply.

T-1 (1.5m) - This is our premier leased line service. Perfect for businesses who truly understand the value of staying connected. We offer very competitive prices and phenomenal service.

Web-Hosting Services – With same day setup you can be up and running on our reliable NT and 2000 Servers with ease. Our servers support FrontPage extensions and redundant backbones for reliability. All servers are monitored 24/7 for reliability and performance.

POP3/SMTP Email Services – Generic email boxes or your own domain, we'll provide POP3/SMTP services for your organization while providing you with the ability to administer you own email domain, or we'll do it for you.

Web-Mail Services – Our pop3 email services are also available via web based email client access through your browser for access to you email from anywhere.

DNS Services – We offer a complete line of DNS and sub-domain services.

Specialty products include:

Metered T-1 (1.5M) - This is a T-1 where you pay for USAGE rather than bandwidth. This is a cost effective T-1. Our clients typically save 40% compared to a traditional T-1.

Wireless (High speed) - This "always on" bandwidth will cut your costs and offer you better bandwidth than leased lines (where available).

MDU/MTU - These products not only saves you money, it makes you money. Our specially designed systems offer a megabit or more of access to any company with business or residential tenants. These systems were developed to offer a "Partnership Plan" service to property owners and management companies. Imagine delivering high-speed Internet without the expense and trouble of re-wiring.

Hospitality – With smart switching technologies we can offer affordable high-speed Internet access for guest access. Our specially designed systems offer a megabit or more of access without the expense and trouble of re-wiring.
